

Project Design Phase-II

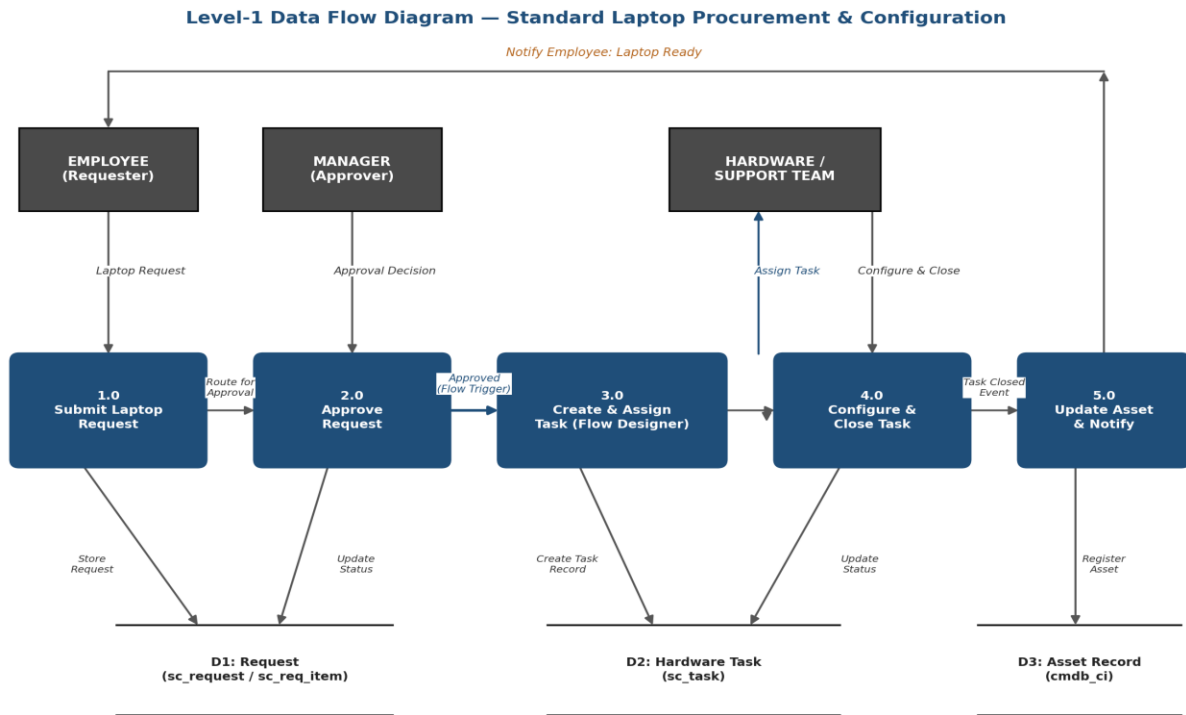

Data Flow Diagram

& User Stories

Date	23 September 2026
Team ID	SWTID-2026-9408
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) shows how data moves through the system — how a request enters, what transforms it, where it is stored, and who acts on it. The Level-1 DFD below maps the standard laptop procurement and configuration process end to end.

User Stories

The table below lists the user stories for each user type affected by this solution:

User Type	Functional Requirement (Epic)	USN	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requester)	Laptop Request Submission	USN-1	As an employee, I can submit a standard laptop request through the ServiceNow Catalog so that I don't have to email IT manually.	Request appears in "My Requests" with a tracking number	High	Sprint-1
Employee (Requester)	Laptop Request Submission	USN-2	As an employee, I want my department and manager fields auto-filled from my profile so that I don't enter them manually.	Fields are pre-populated and read-only	Medium	Sprint-1
Employee (Requester)	Status Tracking & Notifications	USN-3	As an employee, I receive an email once my laptop is configured and ready for pickup so that I know when to collect it.	Email sent within minutes of task closure	High	Sprint-2
Manager (Approver)	Approval Workflow	USN-4	As a manager, I can approve or reject a laptop request from my ServiceNow inbox so that I don't need a separate ticket.	Approval action updates request status immediately	High	Sprint-1
Manager (Approver)	Approval Workflow	USN-5	As a manager, I can add a rejection reason so the requester understands why the request was declined.	Reason is visible to the requester on rejection	Medium	Sprint-2
IT Procurement Team	Status Tracking & Notifications	USN-6	As an IT procurement team member, I can view a dashboard of all pending / in-progress laptop requests to track turnaround.	Dashboard shows stage, requester and elapsed time	Medium	Sprint-2
IT Procurement Team	Automated Task Creation & Assignment	USN-7	As an IT procurement team member, I don't have to manually create a hardware task once a request is approved — it happens automatically.	Task auto-created within 1 minute of approval	High	Sprint-1
Hardware / Support Team	Automated Task Creation & Assignment	USN-8	As a Hardware team member, I automatically receive a configuration task assigned to my group as soon as a request is approved.	Task appears in my group's queue with correct priority	High	Sprint-1
Hardware / Support Team	Automated Task Creation & Assignment	USN-9	As a Hardware team member, I can close the task once configured, which auto-updates the request and notifies the requester.	Closing task triggers stage update & notification	High	Sprint-1
Hardware / Support Team	Automated Task Creation & Assignment	USN-10	As a Hardware team member, I receive an escalation alert if I haven't started a task within 4 hours so that SLAs aren't missed.	Escalation notification sent to team lead	Medium	Sprint-2
